

## Wire Binding Guidelines and Specifications

### Regular Wire Binding

Twin Loop can bind documents from smaller than A6 to A3 long edge for pages up to 35mm thick and A2 long edge (594mm) for pages up to 12mm thick.

When setting out your pages, it is good practice to keep all text or images at least 10mm away from the binding edge to not cut into when the holes are punched into the pages.

### Wall Calendar Sizes:

**A5** (148 x 210mm) up to maximum **A2** (420 x 594mm).

**A3** and **A4** calendars are available in landscape or portrait with holes punched on the long or short edge. **A2** calendars are available in portrait only with holes punched on the short edge

When setting out your pages, it is good practice to keep the image at least **15mm** away from the binding edge so that the 'Thumb Cut' (also referred to as 'Half Moon') does not cut into text or image.

### Tent (Desk) Calendar

When setting out your pages, it is good practice to keep all text or images at least 10mm away from the binding edge to not cut into when the holes are punched into the pages.

Available from as small as A6 to as large as A3 long edge
